

Mary L. Cook Public Library

Community Playscape

What

Mary L. Cook Public Library is beginning the development of a Community Playscape, starting in Spring 2024. The first step in the process is the creation of a master plan.

Due to the current unknowns regarding state budgeting to libraries, the scale and timing of the park project are being reconsidered.

Why

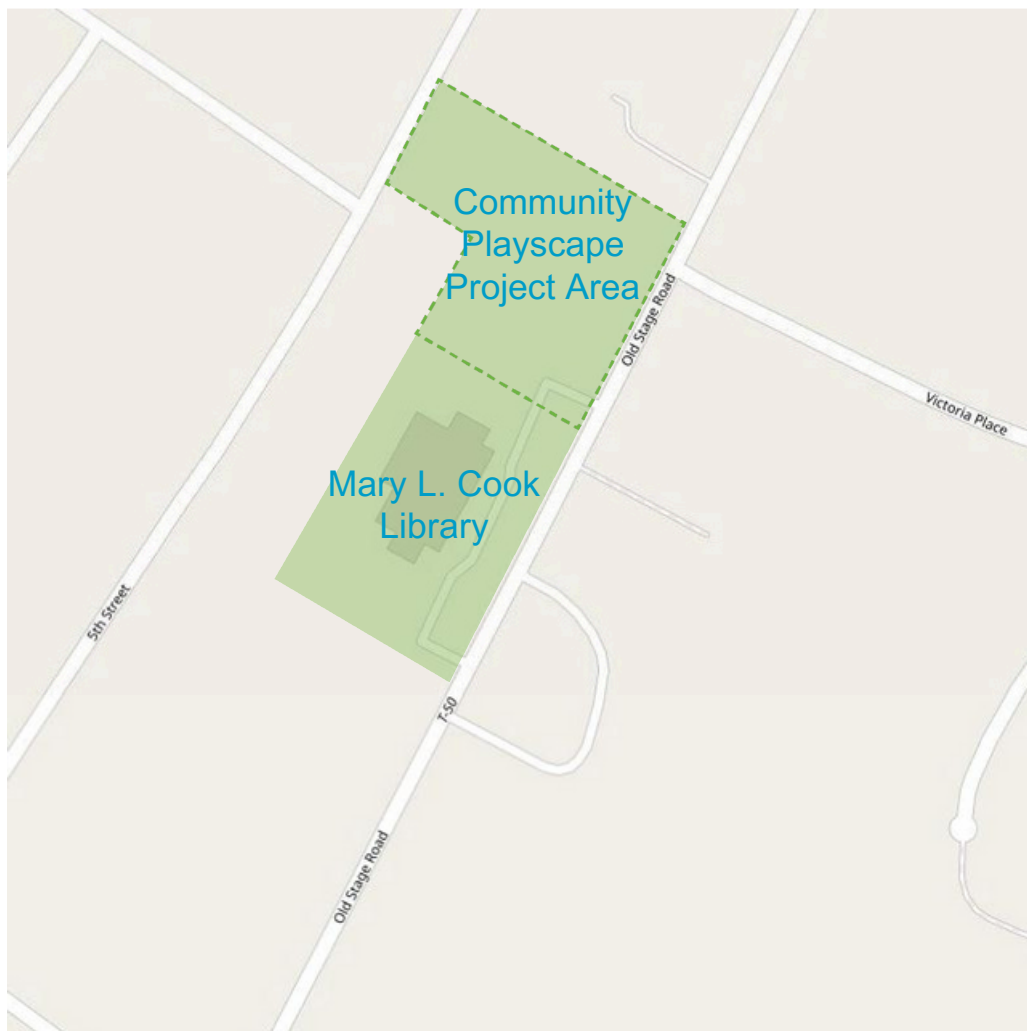

The Village of Waynesville is growing and needs additional park space as well as other amenities for current and future residents. Parks connect residents to nature and support their physical and mental well-being.

The Library recently acquired an adjacent parcel of land at 415 Old Stage Road, which is a 1.173 acre parcel containing an existing single-family dwelling, for a total of 4.578 acres of Library-owned property. The Library land to be developed includes a portion of the 381 Old Stage Road parcel and the entirety of the 415 Old Stage Road parcel. The existing single-family dwelling will be demolished as part of the project.

Where

The Community Playscape is located adjacent to the existing library at 381/415 Old Stage Road, Waynesville, OH. The community Playscape will be accessed from the existing library property and off of Old Stage Road.

Location Map

How

The master plan, design, and phased implementation of the project is possible through available library reserve funds.

Who

Mary L. Cook Public Library owns the Community Playscape parcels and is re-imagining it to better serve local residents.
